

The Early Childhood Learning Experience

Toddlers Activity Center

Toddlers are unique in many ways including their early childhood care and learning needs. Each child's level of development is different as they are beginning to walk, talk, and develop new relationships. As your child grows in his or her toddler years, it is important to provide an even balance of nurturing, learning, and activity time that allows each child to develop individually. Our specialized toddler curriculum addresses well defined learning goals and standards that enhance your child's social, physical, and emotional development.

At Angels Academy, the toddler program is filled with creative learning outlets that help our students begin their early childhood development. Our teachers develop daily activities that allow children to become more comfortable with the classroom learning environment. The teachers help toddlers learn appropriate ways to express their needs and feelings while developing new classroom relationships.

Enriching classroom activities help our students build their early childhood language, listening, math, motor, sensory, and social skills. Our dedicated and trained classroom teachers incorporate singing, motor skills, and sensory exploration into daily activities to inspire and support your child's development and exploration.

Toddlers Program – Scope and Sequence – Learning Objectives

Program	Concept	Concept	Concept	Concept
Language Arts Development Language and Phonics	<ul style="list-style-type: none"> Language development and listening skills that include letters, colors, and shape recognition 	<ul style="list-style-type: none"> Looking at books with natural wonders Finger Plays to enhance language development 	<ul style="list-style-type: none"> You Baby Can Read – Early Language Development Spanish Language Lessons Listen to music and sing 	<ul style="list-style-type: none"> Circle group activity time to enhance awareness, social, and communication skills Read Together – Talk Together

Early childhood preschool activities that are developmentally appropriate and suitable for toddlers are very important. Toddlers develop and reach milestones at different rates and times. Toddler milestones are tracked and recorded related to a child's age, physical ability, language development, social development, and early learning development. We are here to establish a solid foundation for children during their early childhood development.
